

User Guide

Alireza Sadeghi

February 22, 2022

1 First Page

On the first page you can select the title and class of the document you want, then write your name as the author and select the date you want. After all these actions, click on the submit button.

2 Second page

On the second page you can write sections for the document. First write the title of your section in the first field and then write the paragraph of this section and then click the Add button at the top of the title section. After pressing the button, your section will be saved and the fields will be cleared.

* THERE IS NO PROBLEM IF YOU MISSPELLED THE WORDS BECAUSE YOU CAN CHANGE THEM LATER FROM THE .TEX FILE**

* YOU CAN ONLY USE THE ”

” CHARACTER TO INSERT A NEW LINE IN A SECTION **

3 Package Adding

To add a package, on the second page you can do this from the menu bar at the top of the page with the package name.

4 Package Remove

To delete a package, on the second page you can do this from the menu bar at the top of the page with the package name.

5 Bibliography

After writing all your sections, click on the BiblioGraphy item at the top of the page in the menu bar.

To add a bibliography to your document, write your reference in the blank field and then click the Add button.

* This is an optional field **

6 Convert

After adding all your references, click on the finish item in the menu bar.

Then , you can find the pdf of your document in the Output-Document directory in the main project file.

You can also find your .tex file in the project file.

Good Luck ;)
